

**DATA SHEET** 

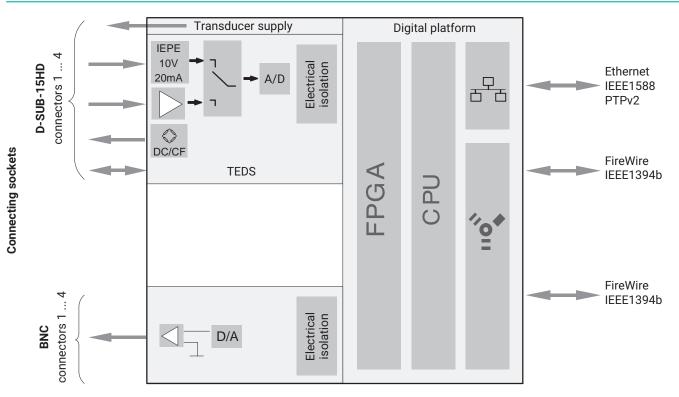

# **QUANTUM<sup>X</sup>** MX410B Highly dynamic universal amplifier

#### **SPECIAL FEATURES**

- 4 individually configurable inputs (electrically isolated)
- Connection of more than 5 transducer technologies
- Individual sample rates up to 100 kS per channel, 200 kS at 2 channels
- 24-bit A/D converter per channel for synchronous, parallel measurements
- 4 analog outputs
- Real-time computation (Peak, RMS)
- Supply voltage (DC) for active transducers: 5 V ... 24 V

#### **BLOCK DIAGRAM**

| MX410B   |         |  |
|--|---------|--|
| General specifications   |         |  |
| Inputs   | number  | 4, electrically isolated from each other and from supply <sup>1)</sup>   |
| Transducer technologies per connector  |         | Strain gage, half and full bridge (carrier frequency or DC),<br>Quarter-bridge with 1-SCM-SG120/350, piezoresistive full<br>bridge, IEPE (ICP <sup>®</sup> ), Inductive half and full bridge, voltage,<br>normalized voltage (±10 V), electric voltage up to 300 V<br>CAT II with Adapter-SCM-HV, normalized current (20 mA) |
| A/D conversion   |         | 24-bit delta-sigma converter   |
| <b>Sample rates</b> (Domaine adjustable by software, Fac-<br>tory setting is "HBM Classic")  | Hz      | Decimal: 0.1 100,000, adjustable for each channel<br>0.1 200,000 in two-channel mode<br>HBM Classic: 0.1 96,000 adjustable for each channel<br>0.1 192,000 in two-channel mode   |
| Bandwidth (-3 dB)  | kHz     | 40 (filter off)  |
|  | 1012    | 80 in two-channel mode   |
| Active low pass filter (Bessel/Butterworth, adjustable)                                      | Hz      | 0.1 20,000   |
| Transducer identification  | 112     | TEDS, IEEE 1451.4  |
| max. TEDS module distance  | m       | 100  |
| Transducer connection  |         | D-SUB-15HD   |
|  |         |  |
| Analog outputs   |         | 4 (BNC), electrically isolated   |
|  |         | to measurement inputs and to supply (not to one another)   |
| Supply voltage range (DC)  | V       | 10 30 (nominal (rated) voltage 24 V)   |
| Supply voltage interruption  |         | max. for 5 ms at 24 V  |
| Power consumption  |         |  |
| without adjustable transducer excitation   | W       | < 12   |
| with adjustable transducer excitation  | W       | < 15   |
| Supply voltage (active transducers)  |         |  |
| Adjustable transducer excitation (DC)  | V       | 5 24; adjustable channel by channel  |
| Maximum output power   | W       | 0.7 per channel / 2 in total   |
| Ethernet (data link)   |         | 10Base-T / 100Base-TX  |
| Protocol/addressing  | -       | TCP/IP (direct IP address or DHCP)   |
| Plug connection<br>Max. cable length to module   | -       | 8P8C-modular plug (RJ-45) with twisted pair cable (CAT-5)<br>100   |
|  | m       |  |
| Synchronization options<br>EtherCAT <sup>®4)</sup>   |         | IEEE1394b FireWire (only QuantumX, automatically,<br>recommended)  |
|  |         | via CX27   |
| IRIG-B (B000 to B007; B120 to B127)  |         | via MX440A- or MX840A input channel  |
| IEEE1588 (PTPv2), NTP  |         | Ethernet based Network Time Protocol   |
| PROFINET   |         |  |
| IEEE1394b FireWire (module synchronization, data link, optional supply voltage)              |         | IEEE 1394b (HBM modules only)  |
| Baud rate  | MBaud   | 400 (approx. 50 MBytes/s)  |
| Max. current from module to module   | A       | 1.5  |
| Max. cable length between nodes  | m       | 5  |
| Max. number of modules connected in series (daisy chain)                                     | -       | 12 (= 11 hops)   |
| Max. number of modules in a IEEE1394b FireWire system (incl. hubs <sup>2)</sup> , backplane) | -       | 24   |
| Max. number of hops <sup>3)</sup>  | -       | 14   |
| Nominal (rated) temperature range  | °C [°F] | -20 +65 [-4 +149]  |
| Storage temperature range  | °C [°F] | -40 +75 [-40 +167]   |
| Relative humidity  | %       | 5 95 (non-condensing)  |
| Protection class   | -       |  |
|  | 1       | 1  |

When variable transducer supply is used, there is no electrical isolation from the supply.
 Hub: IEEE1394b FireWire node point or distributor

<sup>3)</sup> Hop: transition from module to module/signal conditioning

 <sup>4)</sup> EtherCAT<sup>®</sup> is a registered trademark and patented technology, licensed by Beckhoff Automation GmbH, Germany
 <sup>5)</sup> Mechanical stress is tested in accordance with European standards EN60068-2-6 for vibration and EN60068-2-27 for shock. The devices are exposed to an acceleration of 50 m/s<sup>2</sup> within the frequency range 5...65 Hz in all 3 axes. Duration of this vibration test: 30 minutes per axis. The shock test is implemented at a nominal (rated) acceleration of 350 m/s<sup>2</sup> for a duration of 6 ms, half sine and with shocks in each of the six possible directions.
6) With half bridge : 0.1

 $^{7)}$  Range can be modulated up to 5 k $\Omega,$  in this case: up to 1 % absolute zero deviation

| Connecting elements for QuantumX modules        | Connecting elements (clips) for QuantumX modules; Set comprising 2 case clips including mounting material for fast connection of 2 modules.  | 1-CASECLIP   |
| Connecting elements for QuantumX modules        | Fitting panel for mounting of QuantumX modules using case clips (1-CASECLIP), lashing strap or cable tie. Basic fastening by 4 screws.   | 1-CASEFIT  |
| QuantumX Backplane (big)                        | QuantumX Backplane – for a maximum of 9 modules<br>- Mounting on wall or control cabinet (19")<br>- Connection of external modules by FireWire possible<br>- Power supply: 18 30 V DC / max. 5 A (150 W)   | 1-BPX001   |

| Article  | Description   | Order No.      |
|--|---|----------------|
| QuantumX Backplane (Rack)                            | QuantumX Backplane – Rack for maximum 9 modules;<br>- 19" rack mounting with handles left and right;<br>- Connection of external modules via FireWire possible;<br>- Power supply: 18 30 V DC / max. 5 A (150 W).   | 1-BPX002       |
| QuantumX Backplane (small)                           | QuantumX Backplane - for a maximum of 5 modules;<br>- Connection of external modules by FireWire possible<br>- Power supply: 11 30 V DC/ max. 5 A (90 W)  | 1-BPX003       |
| Transducer side                                      |   |                |
| 120 ohm strain gauge quarter bridge module           | Signal conditioning of strain gauge quarter bridge at<br>QuantumX full bridge input. Integrated 120-ohm comple-<br>tion resistor; soldering points for transducer cable<br>(3 wire); TEDS; D-Sub-HD device connection.  | 1-SCM-SG120    |
| 350 ohm strain gauge quarter bridge<br>module        | Signal conditioning of strain gauge quarter bridge at<br>QuantumX full bridge input. Integrated 350-ohm comple-<br>tion resistor; soldering points for transducer cable<br>(3 wire); TEDS; D-Sub-HD device connection.  | 1-SCM-SG350    |
| High-voltage signal conditioner                      | High-voltage signal conditioner for differential<br>measurement of voltages up to 300 V CAT II with type<br>MX840A/B, MX410/B and MX440A/B QuantumX mod-<br>ules, with SubHD connector and fixed, 1-m-long measur-<br>ing leads with 4-mm laboratory plugs.   | 1-SCM-HV       |
| DSubH 15-pol. to-BNC pole adapter                    | Adapter for QuantumX, BNC socket to SubHD 15-pole (pin 14), for connecting 60 V, +/10 V or IEPE / $ICP^{(B)}$ , provided that the amplifier supports this function  | 1-SUBHD15-BNC  |
| DSubHD 15-pole connector kit with<br>TEDS chip       | DSubHD 15-pole connector kit (male) with TEDS chip for<br>storage of a sensor data sheet; Housing: Metallized plas-<br>tic with knurled screws.<br>Note: The TEDS chip comes blank.   | 1-SUBHD15-MALE |
| DSubHD 15-pole connector kit                         | DSubHD 15-pole connector kit (male); Housing: Metallized plastic with knurled screws.   | 1-CON-P1025    |
| TEDS-Package 1 kb (5 pieces)                         | Package of TEDS chips. Package of 5x 1-wire-EEPROM<br>DS28E07 (IEEE 1451.4 TEDS)  | 1-TEDS-PAK-B   |
| TEDS-Package 4 kb (5 pieces)                         | Package of TEDS chips. Package of 5x 1-wire-EEPROM<br>DS24B33 (IEEE 1451.4 TEDS)  | 1-TEDS-PAK     |
| Port saver, SubHD 15 pol.                            | 4 x D-SUB HD 15 pin male to female port savers; protect-<br>ing the wear and tear for frequent plugging and unplug-<br>ging. Extends contact durability by min. 500. Adaptor<br>attaches securely with screws 4-40 UNC.   | 1-SUBHD15-SAVE |
| Software and product packages                        |   |                |
| catman <sup>®</sup> AP<br>catman <sup>°</sup> AP     | Complete package including catman <sup>®</sup> Easy functionality<br>plus additional modules such as integration of video cam-<br>eras (EasyVideoCam), complete post-process analysis<br>(EasyMath), automation of recurring processes<br>(EasyScript), offline preparation of measurement projects<br>(EasyPlan) as well as additional functions such as calcu-<br>lating electrical power, special filters, frequency spectrum,<br>etc. More details at www.hbm.com/catman/ | 1-CATMAN-AP    |
| catman <sup>®</sup> Easy<br>catman <sup>®</sup> Easy | The basic software package for measurement data acqui-<br>sition comprises convenient channel parameterization<br>using TEDS or the sensor database, measurement job<br>parameterization, individual visualization, data storage<br>and reporting.  | 1-CATMAN-EASY  |

| Article                           | Description   | Order No.         |
|-----------------------------------|---|-------------------|
| catman <sup>®</sup> PostProcess   | Post Process edition for visualization, preparation and<br>analysis of measurement data, including many mathemat-<br>ical functions, data export and reporting.   | 1-CATEASY-PROCESS |
| MX410B + catman <sup>®</sup> EASY | <ul> <li>Package including:</li> <li>MX840B amplifier (1-MX840B)</li> <li>Power supply (1-NTX001)</li> <li>4 transducer plugs (1-CON-P1025)</li> <li>Ethernet Cross-over cable (1-KAB239-2)</li> <li>catman®Easy software from HBM (1-CATMAN-EASY)</li> <li>Including software maintenance for the first 12 months</li> </ul> | 1-MX410B-PAKEASY  |
