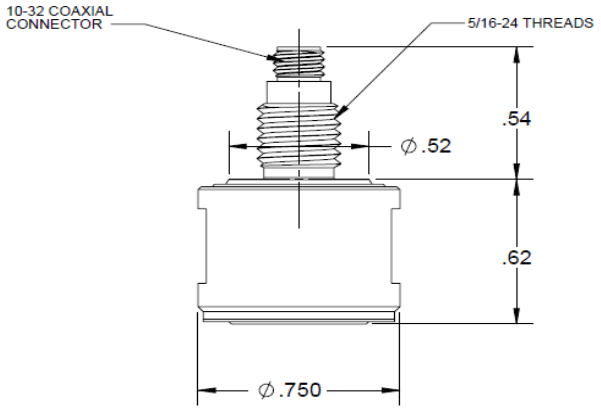
Notes:

[1] Absolute maximum tension. Do not exceed in any case!
[2] Measure using zero-based straight line method, % of F.S. or any lesser range.
[3] All specifications are at room temperature unless otherwise specified.
[4] Do not apply power to this system without current limiting, 20 mA MAX. To do so will destroy the IC charge amplifier
[5] In the interest of constant product improvement, we reserve the right to change specifications without notice.
It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts.



Units on the line drawing are in inches, units in brackets are in millimeters. Refer to 127-1050V for more information.
